Subject Index

16S rRNA, *185*
absorption, 367
abundance, *395*
acoustic sensor, 301
alewives, 93
algae, *245*
amphipod, *360*
amphipods, 100
Archara, 185
atmosphere, 310
attenuation, 367
aversion, 315
AVHRR, *467*

bacteria, 166, *185, 214*
bacteria abundance, *214*
bacterial production, 166, *214*
bacterioplankton, *196*
bald eagle, *434*
ballast water, 201
base metal ores, *162*
beach ridge, *1*
benthic algae, 133
benthic flux, *113*
benthic invertebrates, 58, *340*
benthic macroinvertebrates, *360*
benthic nepheloid layer, *133, 196*
bioaccumulation, 316
biocides, 201
biomagnification, 316
bio-optical algorithm, *443*
biovolume, *196*
Black Sea, 123
bloater, 70
bluegill, *315*
BNL, *133*
bowen ratio, 241
bulk properties, 407
buoyancy, 70
Bythotrephes, 300, 315
Bythotrephes longimanus, 1
carp exclusion, 44
CDOM, *97, 443*
cell morphology, *196*
chemical speciation, *245*
Chicago, 310
Chlorella, 245
chlorobornanes, 316
chlorophyll, 166, *269, 481*
chlorophyll a, *443, 459, 467*
climate, 367
climate change, 184, *20*
climate conditions, 184
coastal, 114
coastal wetlands, 31, 44, 58, *82*
colonization, *285*
community DNA, *185*
community ecology, *327*
copper, *245*
copper smelting, *162*
Coregonus artedii, 369
Coregonus hoyi, 70

cyanobacteria, *245*
Cyclotella, 256

daily ration, 70
Daphnia ephippia, 285
deepwater cisco, *395*
densities, 58
Detroit River, 82
diagenesis, *113*
diapause eggs, *285*
diet, 93, 287, *407*
digital elevation models, 9
Diporeia, 340, 360
dissolved organic carbon, *97*
dissolved organic matter, 367, *97*
dissolved oxygen, 22
dissolved oxygen depletion, 133
distribution, *340*
disturbance, 114
diversity, 58
DNA hydridization, *185*
Dreissena polymorpha, 360
Dreissena spp., 100

ecological status, *360*
ecosystem recovery, 22
effort dynamics, 252
endocrine disruption, 82
energy fluxes, 241
estuary, 293
Eucarya, 185
exotic species, 381
extreme events, 293

food web, 44, *316*
food webs, 31, *327*
functional response, *300*

gene frequency, *285*
glutaraldehyde, 201
Great Lakes, 114, 148, 252, 419, 435, *64, 214, 230, 269, 459, 467*
Great Lakes coastal wetland, 349
Green Bay, 58
growth, 227, *451*
gut puncture, *315*
Gymnocephalus cernuus, 287

habitat, 93, 349
habitat heterogeneity, *327*
heat tolerance, 360
heritability, 360
hydrology, *82*
hydrostatic pressure, 70
hypochlorite, 201

IADN, 310
inlet dynamics, *55*
in-use pesticides, 435
invasive nonindigenous species, 201
invasive species, 123

Kalamazoo River, 407
Keweenaw Bay, *300*
Keweenaw Current, *41, 369*

Lake Erie, 22, 133, 241, 277, 381
lake herring, 316, *327, 385, 395, 407, 423*
lake level, *1*
lake levels, 184, 419, *20*
Lake Michigan, 58, 93, 227, 301
Lake Michigan-Huron, 419
lake modeling, 267
Lake Ontario, 277
Lake Superior, 1, 293, 349, *1, 20, 41, 64, 97, 113, 133, 214, 269, 300, 340, 360, 369, 385, 395, 407, 414, 423, 434, 443, 459, 467, 481*
lake trout, 316, *300*
lake whitefish, 451
large lake-small lake exchange, *55*
larval fish, 287, 349
larval fishes, *369*
late Holocene, *1*
Laurentian Great Lakes, 123, 201
life history traits, 451
light, *245*
Limnocalanus, 22

macrobenthos, 114
macrophytes, 100
maturation, 451
meiobenthos, 114
MELN, 82
mining, *162*
model, *414, 423*
model complexity, 267
morphometrics, *385*

net ecosystem production, *230*
numerical methods, *41*
numerical modeling, *41*
nutrient status, *256*
nutrients, *82*

optical sensor, 301
organic carbon, *113*
organochlorines, 277
otolith, 227

PAHs, 82
PCBs, 310
perch, *315*
Pere Marquette River, 397
pesticides, 310
phosphorus, 166, *113, 256*
photoirradiation, *97*
photosynthesis, *230*
phytoplankton, 133, *256, 269*
picoplankton, *185*
piscivory, 381
PLHC-1, 82
polychlorinated biphenyls, 277
Ponto-Caspian, 123
predation, 381
production, *196*
productivity, *434*
psammobiont testate amoebae, 123

rainbow smelt, 22, 316, *395, 414, 407*
rainbow trout, 397
recruitment, *414, 423*
remote sensing, 148, *443, 459, 481*
resilience, 22
respiration, *230*
restoration, 44
resuspension, *147*
retention, *82*
round goby, 100, 381
routine oxygen uptake, 70
ruffe, 287
runoff, 9

salinity tolerance, 123
Salvelinus namaycush, 252
sand, 114
sand-dwelling Testaceafilosia, 123
satellite, 148
scale, *327*
scattering, 367
scatterometer, 148
SeaKleen, 201

SeaWiFS, *443, 459, 467*
sediment, 82
sediment cores, *285*
sediment erosion rates, 407
sediment trap, *147*
sedimentation, *147*
sediments, *162*
seiche, 293
settling flux, *147*
Siskiwit Lake, 316
size-selective planktivory, *327*
size-structure, 381
smallmouth bass, 381
solar, *97*
southeastern Michigan, 9
spatial distribution, 435
spatial patterns, 58
spatial variation, 267
spawning habitat selection, 397
species coexistence, 100
spectral reflectance, *481*
spottail shiner, *315*
spring runoff event, *64*
spring thermal bar, *369*
St. Louis River, 293
St. Louis/Allouez Bay, 349
stable isotopes, 31, 316
stock structure, *385*
storm, 148
stream connectivity, 9
suspended sediments, 277
suspended sediment measurement, 301
suspended solids, *133*
swim bladder, 70
synoptic climatology, 419

Tahquamenon, *1*
thermal bar, *41, 64*
thymidine incorporation, *196*
total suspended solids load, *64*
towsled, 349
toxaphene, 316
trace mercury, *162*
trends, *20*
trophic dynamics, *327*
TSM, *459, 467*

ultraviolet radiation, 367
urbanization, 9
usage, 435

variability, 310
variable source areas, 9
veligers, 360
vertical migration, 70
viruses, 166

water budget, *20*
water color, *481*
water quality modeling, 293
well-mixed, 267
wind fields, 148
winter survival, 227

yellow perch, 93, 100, 227

zebra mussel, 360
zooplankton, 1, *395, 407*
